

CMA162M

Cluster mounting set 2 x ATEO6M speaker

Product information:

The CMA162M is a cluster mounting set, allowing assembly for 2 pcs of ATEO6M speakers to any ceiling. This solution is designed for applications in large open indoor spaces where a uniform sound dispersion in all directions is required. Some typical application examples are sports facilities, gym's, large warehouses, hallways, and many more. The CMA162M is constructed of solid steel and comes fully assembled, including pole and ceiling mount. The distance to the ceiling measures 360 mm and the pole allows cable integration, so a clean and elegant solution is offered. The tilted mounting plates in combination with the Clevermount+™ bracket structure allows optimal directional placement in any application. The CMA series also come in a 4 speaker model (CMA164M), allowing mounting of speakers in all 4 directions and are available in both Black (/B) or White (/W) colours, to match the speakers colour and blend in with the environment. The CMA162M comes delivered excluding the loudspeakers.

Usage:

Indoor

Product Features:

Dimensions		179.2 x 357.5 x 140 mm (W x H x D)
Construction		Steel
Finish		Structured powder coating
Max. load		10 kg (5 kg / each side)
Suited for		ATEO6M loudspeakers only
Accessories	Included	Speaker mounting screws
